

«AN ENDGAME EXPERT»

by GM Igor Smirnov

The practical part: Task 11.

Your task:

1. Select **YOUR** games where an endgame stage happened. Save these games in a separate database (15 games minimally).
2. Analyze these games and find your mistakes:
 - First, analyze the game by yourself.
 - Secondly, check your analysis with a computer program.

The notes:

- After a study of this course your endgame understanding became much better than it was. That's why you will find a lot of mistakes in your past games.

It is a very important task and I strongly recommend that you perform it. It will help you "to feel" your advancement and will strengthen your self-confidence in chess! It will also motivate you to keep learning (in order to continue your chess progress)!

- If you don't have any chess programs – simply analyze the games by yourself.
- Send your results (your games with a plenty of question marks ☺) to smirnovigor2006@gmail.com

Write "An Endgame Expert (my games)" in the subject field.
