

**SELF-TAUGHT GRANDMASTER****The Practical Part: TASK 3**

This time you will find mistakes in your own games. As you have already seen 2600+ GMs break the base strategic principles pretty often. What about you?
☺

Your task: analyze your last 10 games. At least 5 of them should be the losing ones. Apply your general understanding and find the positions where you broke the base strategic principles of a chess game. Check up your every move!

After that, check your analysis with a computer.

The notes:

- Use the plan for an analysis of your own games from the 3rd video lesson.
- If you can find mistakes in your past games – it means that you get better in chess.
