

DEFENDING CHAMPION

The practical part: Fortress

The first task in the practical course is about **the fortress**. In chess, it is possible that the small army can resist against much stronger opposing forces by hiding within the wall, built with the pawn and defended with the pieces. If you understand this idea, then you can understand what the fortress is. :-)

In the "Games" folder, you will find 12 instructive games, which illustrate the main ideas of the video lesson.

1) Your task is to open the file: "Task - Answer - Fortresses". Use a real chessboard and re-create the position there. Study each position for 3-5 minutes.

2) Check the solutions: Open the folder: "Answer - Fortresses" and check the solutions carefully.

Note: If you have problems finding the solutions, then please watch the eighth video lesson again.
