

**SELF-TAUGHT GRANDMASTER****The Practical Part: TASK 7**

The 7th task is dedicated to your **tactical skills**.

Your task:

Open a database "1Games (task)" and find a solution (the best move) in the given positions.

After that, go to the database "2Games (answer)" and check yourself.

The notes:

- You should use your USUAL thinking system while finding the best move.
- You may spend 10 minutes for each position.
- In most positions you will need to calculate some variations. Thus you can use this task to train your calculation skills as well.
- A certain tactical motif is specified for every position (you will find it in the database with answers). If you can't find the right move in a certain position – you should pay attention to this theme (tactical motif).
